**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claim **10** is rejected under 35 U.S.C. 102(e) as being anticipated by Canfield et al., U.S. Pat. No. 6,310,922.

Considering claim 10, Canfield et al., discloses all claimed subject matter, note:

- a) the claimed method of receiving said input broadcast signal into said digital signal receiver is met by Tuner/Demod/ADC circuit 11, Fig.1;
- b) the claimed method of detecting a frame rate of the input broadcast signal received is met by video decompressor 14, fig.1; (see also col. 6, 56-58)
- c) the claimed method of selecting a clock frequency that corresponds to the frame rate which is detected is met by video decompressor 14 which includes display clock generator, fig.1.
- d) the claimed method of outputting the clock frequency which is selected to components of the digital signal receiver that use the clock frequency to convert the input broadcast signal into a predetermined display format output signal is met by

the display clock generator in video decompress/DMA 14 which outputs the clock signal to format translator 18, Fig. 1, "which includes circuitry to reformat signal for display...may contain apparatus to convert 4:2:0 format video signal to 4:2:2 format, and to convert non-interlaced signal to interlaced signal, etc." (col. 3, lines 18-23).

***Allowable Subject Matter***

1. Claims **1-9** are allowed.
2. Claim **11** is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
3. The following is a statement of reasons for the indication of allowable subject matter: the prior art fails to disclose a format converter for receiving either of a first input digital signal and a second input digital signal, according to which of the first and second input digital signals is present, the format converter for converting the input digital signal into a predetermined display format output signal, and a controller for controlling the switching portion to select and output the clock frequency corresponding to a frame rate of the input digital signal, as in claims 1 and 5; and wherein the step of selecting the clock frequency comprises, outputting a control signal from a controller, said control signal depending upon the frame rate which is detected; receiving said control signal into a selector, said selector connected to outputs of a plurality of phase locked loops, wherein each phase locked loop has a predetermined clock frequency,

and selecting one predetermined clock frequency of one of said plurality of phase locked loops based upon the control signal received by the selector, as in claim 11.

### ***Response to Arguments***

4. Applicant's arguments with respect to claims 10 and 11 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
